

## ADS 200 Adapter kit

### Adapter kit ADS 200 – SDS / hexagon adapter with centre bit

The **adapter kit** ADS 200 is an accessory that ideally complements the core cutter for switch boxes DD 600 U. The **set** is composed of adapters for the **SDS / hexagon adapter with centre bit** with an 8 mm diameter. The **adapter kit** makes it possible to pair the drill bit with various handheld drilling machines during work on

- masonry,
- construction materials,
- chalky sandstone,
- brick, - clinker, and
- firebrick.

### Adapter kit of premium quality

The **adapter kit** ADS 200 is marked by the premium quality that customers have come to expect from Klingspor tools. The **set** with its different SDS and hexagon adapters covers all areas of application. Boasting a diameter of 8 mm, the centre bit offers the ideal strength for guiding the diamond drill bit with utmost precision.

### Adapter for a wide range of applications

When combined with the core cutter for switch boxes DD 600 U, the **adapter kit** ADS 200 offers an extensive range of possible applications - especially in the construction sector. Plumbers, roofers and many other craftsmen will find this adapter kit to be a handy tool, allowing them to drill through walls, ceilings and floors with greater ease. The **set** also proves a useful tool in such branches of handicraft as sculpting as well as for stonecutters.

### Adapter kit with a high safety standard

Klingspor focuses on manufacturing tools that ensure the best possible level of on-the-job safety. Aside from serving the goal of economic optimisation, the development of high-quality and long-lasting materials is intended to guarantee safety during work on stone and concrete materials. For this reason, the adapter kit ADS 200 meets all requirements in terms of on-the-job safety and work simplification.
